Complete Inventory Visibility in the Palm of your Hand

Whether you sell apparel, footwear, cosmetics, sporting goods, or kitchenware, retail continues to be a challenging business. To succeed, you've got to provide exceptional customer experiences, manage inventory, track merchandise, reduce shrink, manage the overall process, and – oh yes – make a profit. With the recent discovery that Stock-on-Hand (SOH) issues cost retailers \$1.1 trillion in lost sales, these challenges are more important than ever before.

That's where ControlSpan™ comes in.

ControlSpan is our Inventory Management System that offers an unmatched view of operations and inventory, as well as reinventing how to discover and resolve shrink beyond the capabilities of traditional methods. And, it's an immediate and long-term solution. Understanding the importance of integration, ControlSpan™ was built with open-architecture in mind. Therefore, integrating with your current systems makes ControlSpan™ the most cost-effective, accurate, and efficient solution. The new ControlSpan™ solution from CONTROLTEK offers end-to-end inventory and process management solutions from source to shopper which allows for improved visibility, intelligence-based manageability, enhanced profitability and customized integration to existing platforms.

The Solution to Retail's In-Stock Problem:

- Inventory Visibility Systems
- Inventory Security Solutions

Why CONTROLTEK?

We provide your complete inventory visibility system with ControlSpan™, our fully integrable IVS system. ControlSpan™...built for retailers, by retailers.
